## Everything Around the Patient

### SPECIAL TO CARIBBEAN BUSINESS

**T**ETRA dispensaries continue to set their focus on providing wellness and a wide variety of alternatives to medical cannabis patients. Currently, there are 14 locations between the areas of San Juan, Bayamón, Carolina, Guaynabo, and Dorado where patients can clarify their doubts, request information and obtain their treatment.

"We are everything your medical cannabis dispensary should be. At Tetra, we design a unique and sophisticated environment, focused on offering the best experience so that the patients feel welcome from the first moment they visit us. Our Budtenders team's mission is to offer, with professionalism, the best for patient treatment while always being empathic with the patient's questions and committed to guiding and assisting each one

as if they were family.", commented Alexis Colón, General Manager of TETRA.

"How can we help you today? That is the question that we always have in mind when receiving each patient. When patients come to us, they come looking for ways to improve their daily living, like being able to sleep better, have relaxed days and have a better ally to combat anxiety, among others. We also go through the same battles; for this reason, we always ensure that we are empathic and professionally provide a variety of products for the treatment"- mentioned Colón.

Currently, the dispensary brand is heading to expand its presence on the island by adding dispensaries in Ponce, Manatí and the west area. These constructions, several from scratch, will be aligned with the professional and sophisticated experience promoted by the brand. Currently, TETRA has over 30K active square feet and a potential future of 25K approx.

TETRA offers a variety of premium quality flowers, edibles, and distilled oils, among others.

"We are working to launch several initiatives for TETRA patients. These include a loyalty program, exclusive discounts, online orders, among others. We want to thank and encourage the patients who select TETRA, as they are the ones who place their trust in us by acquiring what they need to achieve their well-being and balance that they seek in their lives." commented Juan Alvarado - Marketing Manager
